

Birthday Parties

Beyond a Brick LLC offers fun and affordable birthday parties for children of all ages. As a mobile party company, we specialize in fun and educational STEM birthday parties.

What happens at the party?

Our fun and experienced party hosts know exactly how to get the **LEGO**® on! You just name the location (inside only, **LEGOS**® don't like to be outside).

Party hosts will facilitate all the activities, so all you need to do is have fun and relax.

We recommend 1.5 hours for the party, but we can of course tailor the party to suit your child.

Age Range?

All ages love **LEGO**®! But we recommend a party for ages 6 to 12. In addition, all parties will be tailored to age specific participants.

What kind of parties do you offer?

LEGO® ***Engineering***

- ***LEGO***® ***101 Basics*** Participants learn about basic **LEGO**® building and construct specific facilitator-generated builds. Builders will learn techniques to increase their building techniques.
- ***Weeeeeee ZIP LINE*** Participants learn to build a zip-line with an emphasis on the physics. Zip one of your favorite mini-figs down the line.
- ***Speed Indeed*** Participants build simple cars and explore the science behind making them go fast! Learn about friction!

LEGO® ***Architecture***

- ***Build ‘em Big, Watch ‘em Fall*** Participants learn the basics of building structures before constructing their own masterpiece. Making sure they have a sturdy base or surely, they will fall.
- ***Build ‘em Tall Skyscrapers Challenge*** Build your own tall skyscrapers based on historical landmarks and the history of these structures.
- ***Lego® City Construction*** Participants will explore the real world by seeing how engineers and architects work together to plan a city. Then the team constructs buildings of their choice to create a LEGO® CITY to replicate their town.

LEGO® Creation

- ***Makers Artistic Creation*** Participants learn LEGO® basics to create an artistic structure of the birthday person’s choosing. Thousands of LEGO® elements are available to create some amazing builds.
- ***Power T Creation*** Participants use thousands of orange colored LEGOS® to create the Power T to celebrate Rocky Top and The University of Tennessee pride.
- ***LEGO® Challenge*** Open ended building challenge to explore one’s own creativity. Three to four different challenges will be randomly pulled out of a hat and participants will be given a time frame to build.

LEGO® Party Pricing

Birthday party’s base price is \$350 which includes set up, party instruction and clean up. Total time is 2 hours from set up to clean up.

\$100 deposit is required at booking
