

SCIENCE NIGHTS

Beyond a Brick LLC offers fun and affordable Science Nights for children of school age. As a mobile educational company, we specialize in fun and educational STEM activities.

What kind of classes do we offer?

LEGO® Engineering

LEGO® 101 Basics Participants learn about basic LEGO® building and construct specific facilitator-generated builds. Watch how these builds come to life by moving with the wonder of technology.

Weeeeeee ZIP LINE Participants learn to build a zip-line with an emphasis on the science behind velocity. Watch one of your favorite mini-figs zip down the line.

How fast can you go Participants build simple cars and explore the science behind making them go fast! Learn about friction, velocity and making your car go really fast!

LEGO® Architecture

Build ‘em Big, Watch ‘em Fall, Skyscrapers Challenge Build your own tall skyscrapers based on historical landmarks and the history of these structures. Making sure they have a sturdy base or surely, they will fall on the earthquake table!

Lego® City Construction Participants will explore the real world by seeing how engineers and architects work together to plan a city. Then the team constructs buildings of their choice to create a LEGO® CITY to replicate their town.

Power T Creation Participants use thousands of orange colored LEGOS® to create the Power T to celebrate Rocky Top and The University of Tennessee pride.

Beyond a Brick Pricing

FEE: \$450

This includes setup, instruction, clean up with one instructor and one helper.
